CAREER OBJECTIVE

- ❖ Frontend Developer with 2+ years of experience building responsive, scalable, and accessible web apps using React, SCSS, and JavaScript. Eager to contribute to innovative projects while growing with modern frontend technologies and UI/UX best practices.

WORK EXPERIENCE

- ❖ **In2IT Systems & Services Pvt. Ltd, Greater Noida** — *Frontend Developer (June/2023 to Present)*
 - Key Responsibilities —
 - Developed scalable, reusable, and responsive UI components using **React, JavaScript (ES6+), HTML5, and SCSS**.
 - Migrated legacy CSS codebase to a structured **SCSS architecture** for maintainability and modularity.
 - Integrated APIs and dynamic data using React hooks and optimized state management for performance.
 - Actively collaborated with **UI/UX Designers, Backend Developers, and QA/Testers** in a **Scrum-based Agile** environment.
 - Participated in **daily stand-ups, sprint planning, retrospectives, and code reviews** under the guidance of a **Scrum Master**.
 - Used **Figma** for design handoffs, **Git** and **Azure DevOps** for version control and CI/CD pipeline integration.
- ❖ **BrightChamps Tech Private Limited, Remote** — *Coding Educator (May/2022 to Mar/2023)*
 - Key Responsibilities —
 - Conducted **interactive online sessions** teaching **HTML, CSS, and SCSS**.
 - Designed and delivered **real-world mini projects** to simplify web development concepts.
 - Provided **one-on-one mentoring** to help learners build a strong foundation in frontend development.
 - Built mini projects to demonstrate core web development concepts.

EDUCATIONAL DETAILS

- ❖ B.Tech. from ACS College of Engineering — (2018 – 2022)

TECHNICAL SKILLS

- ❖ **Frontend Technologies** — React.js, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, GSAP, Redux, Context API
- ❖ **API & Backend Integration** — RESTful APIs, API Integration, Sanity.io (Headless CMS)
- ❖ **Tools & Platforms** — Git, GitHub, Azure DevOps, VS Code, Postman, Chrome DevTools, React DevTools
- ❖ **UI/UX & Design** — Figma, Responsive Design, Accessibility (WCAG), Performance Optimization, Pixel-perfect Implementation
- ❖ **Development Practices** — Agile Methodology, Scrum, Modular SCSS Architecture, Clean Code Principles, Code Reusability

PROJECTS

- ❖ **Project 1** :=> Care Impact (**Domain**: Health Care Domain)
 - **Project Description**: The **Care Impact** is Healthcare Management System is a **web-based application** developed to streamline healthcare services for patients and hospitals. This project provides an intuitive platform for patients to connect with healthcare professionals, book appointments, and access essential health services online. Hospital management can optimize management of clinical and administrative tasks with reduced paperwork and operational delay.
- ❖ **Project 2** :=> iDashboard (**Domain**: Data Analytics and Visualization)
 - **Project Description**:
The **iDashboard** is Data Monitoring and Visualization based interactive platform designed to empower users with real-time data tracking, custom chart and graph design, and in-depth visual analysis. This project aims to simplify the process of data analysis and decision-making by providing a user-friendly interface for creating personalized, dynamic data visualizations. It enables users to upload and manage Source and datasets from various sources (CSV, Excel, PostgreSQL, MySQL etc.). It provides customizable chart and graph design tools for visualizing data in different formats (bar, line, pie, table, gauge etc.). In this, the Live Data feature allows real-time updates and interactive features to explore and drill down into data. Empower users to export visualizations and reports for sharing or further analysis.
